

Instructions for downloading and running the RAPID demonstration with voice transcript.

Versions are available for Office 2000 (RAPID_DEMO_00.zip) and Office XP (RAPID_DEMO_XP.zip).

For the voice transcript to function properly the Windows decoder for compressed WAV files (*L3codeca.acm*) needs to be installed in your computer and the files should be extracted to a directory named *C:\RAPID_temp*.

The installation will need approximately 18 MB of free disk space.

Start the presentation (COMPLETE_DEMO_00.ppt or COMPLETE_DEMO_XP.ppt).

Progress through the presentation using the arrow on the left-bottom corner, or following the indications given.

To uninstall, simply delete the *C:\RAPID_temp* directory.
